NOTICE OF FILING CUSTOMER EDUCATION PROGRAM

IN COMPLIANCE WITH DECISION NO. 70360

UNS Electric, Inc. ("UNS Electric" or the "Company"), through undersigned counsel, hereby files its inverted block rate structure customer education program for Commission approval, in compliance with Decision No. 70360 (May 27, 2008). UNS Electric proposes (i) placing language on the Company's Web site explaining the inverted block rates (Attachment A); and (ii) adding a bill insert to customer bills as soon as possible after the program has received Commission approval (Attachment B).

1 RESPECTFULLY SUBMITTED this 27th day of June, 2008.

Use less, save more

Everyone knows that saving energy is the best way to reduce your monthly electric bill. But did you realize that people who use less energy actually pay a lower electric rate? It's true. Because the first 400 kilowatt hours you use each month are discounted by nearly 10 percent, customers who use less end up paying a lower rate per kilowatt-hour (kWh) for their power.

The following table shows the difference between the rates paid by residential customers at various usage levels (before taxes and fees):

Monthly usage	500 kWh	1,000 kWh	1,500 kWh
First 400 kWh @ 10.4 cents	400	400	400
Additional kWh @ 11.4 cents	100	600	1,100
Average cost/kWh	10.6 cents	11 cents	11.1 cents

You can see that with UniSource Energy Services, saving energy makes good cents.

Conserving energy can be as easy as turning up your thermostat a few degrees when you're asleep or away from home. Or you could switch to Energy Star-qualified compact fluorescent bulbs, which use 75 less energy, generate less heat and last up to 10 times as long as traditional incandescent lights
